

AJH Reference Style Installation instructions

After downloading the file, save it into the \citationStyles-1.0 folder. This should be found using this path (C:\Program Files (x86)\Mendeley Desktop\citationStyles-1.0) or something similar.

Once saved into that folder, open Mendeley Desktop, click on the View tab, select Citation Style, and then More styles...

Type African Journal of Herpetology. Select it, Click on 'Use this Style' and then 'Done'.

PLEASE NOTE!! All citations and references should still be scrutinized in your manuscript to ensure everything has been captured according to the style outlined in the Instructions to Authors.
